Summary

Software engineer with 3.5+ years of development experience. Currently pursuing a master's in Software Engineering. Passionate about software craftsmanship and eager to work across diverse technology stacks.

Education

Blekinge Institute of Technology

MASTER OF SCIENCE IN SOFTWARE ENGINEERING

Relevant Courses: Software Architecture, Requirements Engineering, Agile Development, Software Testing

Karlskrona, Sweden

Sep 2025 - Present

North South University

BACHELOR OF SCIENCE IN COMPUTER SCIENCE AND ENGINEERING

Dhaka, Bangladesh

Jan 2018 - May 2022

Work Experience

Enosis Solutions

SOFTWARE ENGINEER

Dhaka, Bangladesh

Jan 2022 - Jul 2025

Project: Enosis Outsourcing - B2B Software Development Services (Link)

- Built a data import tool independently, providing core data used across the public site and admin dashboard
- Developed and optimized backend endpoints for the admin dashboard, including search and filtering
- Conducted code reviews and guided junior developers on solutions and implementation strategies
- Technologies: .NET Core, PostgreSQL, Entity Framework Core, Azure DevOps, React

Project: Savance Workplace - Enterprise Workplace Management System (Link)

- Developed and maintained RESTful APIs for mobile, web, and kiosk client applications
- Improved system performance through caching implementation and database query optimization
- Worked closely with the technical lead and project manager to gather and clarify requirements, resolving conflicts when needed
- Technologies: .NET Core, SQL Server, Azure Services, Entity Framework Core

Project: Denticon - Cloud-Based Dental Practice Management Platform (Link)

- Developed and maintained core features across the platform
- Optimized Azure Functions performance, reducing execution time from minutes to seconds through batch processing
- Improved page load performance by implementing Redis caching strategies
- Technologies: ASP.NET Core, SQL Server, Entity Framework Core, Azure Services, Redis, Angular, JavaScript

Technical Skills

Languages	C#, Python, JavaScript/TypeScript, SQL
Backend & Cloud	.NET Core, FastAPI, Entity Framework Core, Dapper, Docker, Azure Services, Redis, RabbitMQ
Databases	SQL Server, PostgreSQL, TimescaleDB
Tools	Git, JIRA, Asana, Azure DevOps
Frontend	Angular, React, Next.js

Projects

Personal Project

NAZAR - PERFORMANCE DATA STORAGE & ANALYSIS PLATFORM

- Designed event-driven modular monolith architecture documented with ARC42 template
- Built async metric ingestion API with FastAPI and RabbitMQ for scalable event processing
- Implemented hybrid anomaly detection combining statistical baselines with Isolation Forest ML
- Technologies: Python, FastAPI, TimescaleDB, RabbitMQ, React, Docker, Scikit-learn
- Source Code: [view on GitHub](#)

Academic Team Project, Blekinge Institute of Technology

IKER FINANCE - MULTI-CURRENCY FINANCE MANAGER

- Built full-stack application using Clean Architecture with CQRS and MediatR
- Designed PostgreSQL schema and data access layer with Entity Framework Core
- Implemented comprehensive testing suite achieving 88.6% method coverage
- Technologies: .NET Core, ASP.NET Core Web API, PostgreSQL, Entity Framework Core, Next.js, xUnit
- Source Code: [Backend \(view on GitHub\)](#) | [Frontend \(view on GitHub\)](#)

Achievements & Certifications

LeetCode Knight	Ranked among the top 4.09% globally on LeetCode (view profile)
Codeforces Expert	Ranked among the top 20% globally on Codeforces (view profile)
Microsoft Back-End Developer	Professional Certificate from Coursera (verify)
