SUMMARY

Software Engineer with 3.5 years of industry experience and a strong background in problem solving and competitive programming. Currently pursuing an M.Sc. in Software Engineering at Blekinge Institute of Technology.

EDUCATION

Blekinge Institute of Technology <i>M.Sc. in Software Engineering</i>	Karlskrona, Sweden <i>Sep 2025 – Present</i>
<i>Relevant Coursework:</i> Software Architectures and Quality, Requirements Engineering and Product Management, Software Testing, Software Metrics, Decision Support Systems, Research Methodologies	
North South University <i>B.Sc. in Computer Science and Engineering</i>	Dhaka, Bangladesh <i>Jan 2018 – May 2022</i>

EXPERIENCE

Enosis Solutions <i>Software Engineer</i>	Dhaka, Bangladesh <i>Jan 2022 – Jul 2025</i>
<i>Enosis Outsourcing, B2B software development services platform</i> - Built a data import tool that loaded over 4,000 company records, used across the public site and admin dashboard - Built and tuned the search-and-filter backend for that company data (schema design, indexing)	
<i>Savance Workplace, workplace management SaaS</i> - Built the pre-launch mobile APIs with the team; maintained the backend for the live web, desktop, and kiosk apps - Cut redundant queries and refactored logic across 3 internal access-control features: visitor management, emergency mustering, and in/out tracking	
<i>Denticon, dental practice management platform</i> - Batched API requests and tuned EF Core (AsNoTracking, indexing, join strategies) to cut Azure Functions execution time from 15 to 20 min down to 5 to 10 sec - Contributed to cutting a Patient Communication stored procedure's runtime from minutes to seconds through execution-plan tuning and indexing	
Technologies: C#, ASP.NET Core Web API, SQL Server, PostgreSQL, Entity Framework Core, Dapper, AutoMapper, Azure Functions, Azure DevOps, Azure Key Vault, Azure App Insights, Redis, React, Angular, Next.js	

TECHNICAL SKILLS

Languages: Python, C#, C++, SQL, JavaScript/TypeScript
AI/ML & LLM Tooling: LangChain, LangGraph, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Vector/Hybrid Search, OpenSearch, Ollama, Docling, Langfuse, Machine Learning
Backend & Cloud: .NET, FastAPI, SQLAlchemy, Entity Framework Core, Dapper, AutoMapper, Redis, Docker, Azure Functions, Azure Key Vault, Azure App Insights, Apache Airflow
Databases: PostgreSQL, SQL Server, TimescaleDB
Frontend: React, Angular, Next.js
Tools & Testing: Git, JIRA, Azure DevOps, pytest, xUnit, Ruff
Practices: Agile and Scrum, REST APIs, CI/CD, Unit and Integration Testing, OOP, SOLID, Design Patterns

PROJECTS

Agentic Research Assistant <i>Python, FastAPI, LangGraph, OpenSearch, PostgreSQL, Airflow, Docker</i> - Built a RAG system over arXiv papers with BM25, vector, and hybrid search, using RRF rank fusion - Designed a 6-node LangGraph pipeline (guardrail, retrieval, grading, rewriting, generation, and out-of-scope handling) that rewrites the query and retries retrieval once before generating a grounded, cited answer with Ollama - Automated paper ingestion and indexing with Airflow, Docling for PDF parsing, and Jina AI embeddings - Exposed standard and agentic RAG endpoints with FastAPI, backed by Redis caching and Langfuse tracing

CERTIFICATIONS & AWARDS

Machine Learning Specialization: DeepLearning.AI & Stanford Online (verify)
Microsoft Back-End Developer: Professional Certificate, Coursera (verify)
LeetCode Knight: top 4% globally (profile)
ACM ICPC Dhaka Regional Finalist: Honorable mention, 2019 (profile)
